

SKYLARK EXIM PRESENTATIO N

www.skylarkexim.com

Our Mission

Our mission is to deliver premium quality seafood to global markets while ensuring sustainability, freshness, and customer satisfaction. We are committed to building long term relationships with our clients by maintaining the highest standards of hygiene, ethical sourcing, and timely delivery.

Our Vision

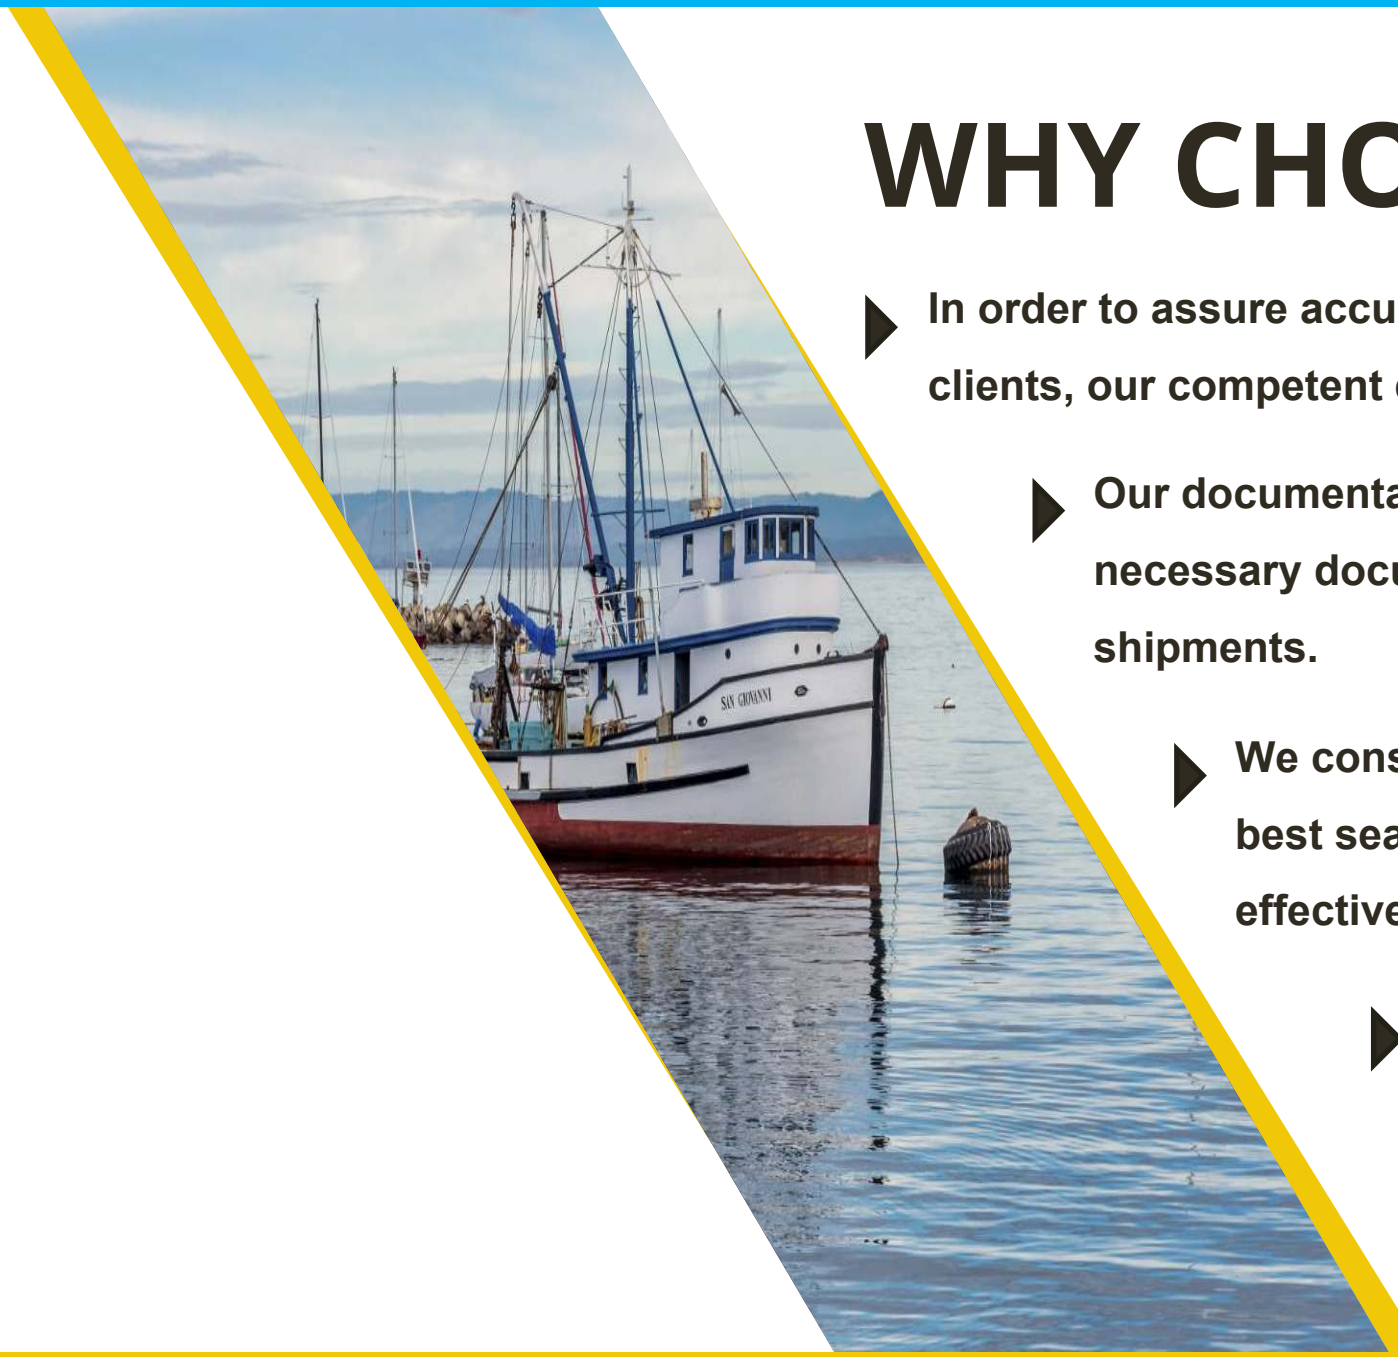

To be trusted global leader in the seafood export industry by delivering premium quality, sustainably sourced seafood to international markets, while building long - term partnerships, supporting coastal commodities, and promoting responsible fishing practices for future generations

ABOUT US

“Skylark EXIM, based in Visakhapatnam, is a trusted seafood exporter delivering fresh and frozen seafood, plus diversified commodities, globally. Rooted in direct sourcing, quality assurance, and transparency”.

Established as a partnership firm with legal documentation from July 2021, Skylark Exim administrates from Sheelanagar, Visakhapatnam. Processing unit at Anandapuram. We specialize in exporting premium seafood including Vannamei, Sea Caught Shrimp, Blacktiger, Fish and Fishery products. Employing stringent quality controls from sizing and glazing to packing. Our approach guarantees freshness, consistency, and superior value for global wholesalers and distributors. Transparency in operations, rapid logistics, and customer-first ethos drive our mission to build resilient international trade partnerships.

WHY CHOOSE US

- In order to assure accurate order handling and prompt delivery to our clients, our competent employees are employed.
- Our documentation staff will professionally prepare all necessary documents and handle logistical tracking of shipments.
- We consider it to be our duty to continually provide the best seafood, culture material, and solvents in the most effective manner and quickest amount of time.
- For our clients, our quality control staff will guarantee top-notch quality.

OUR PACKING

We Deliver Worldwide

BLOCK

IQF

SEMI IQF

Our Packing includes Block, IQF, SEMI IQF

OUR WORK FLOW

1.Raw Material procurement

- Shrimp are sourced directly from farms or fishing vessels.
- Initial quality checks (size, freshness, health) are done before acceptance.

2.Receiving & Washing

- Shrimp are transported under chilled conditions to the processing plant.
- Thorough washing with clean, treated water to remove impurities.

3.De-heading/peeling & Deveining
(based on product requirement)

- Manual or machine processing to remove head, shell, and vein.
- Some products may be processed as Head-On, Headless, Peeled, or Value-Added.

OUR WORK FLOW

4.Grading & Sorting

- Shrimp are sorted by size, weight, and type.
- Grading ensures uniformity for export standards

5.Quality control & Inspection

- Checks for hygiene, freshness, texture and absence of defects.
- Samples tested for international food safety compliance.

6.Freezing & Glazing

- Shrimp are frozen using IQF (Individually Quick Frozen) or block freezing.
- Glazing (a thin ice layer) applied to preserve freshness during shipment.

OUR WORK FLOW

7.Packing

- Packed in export-grade cartons, vacuum packs, or customized packaging.
- Labels with product details, size, batch, and export compliance.

8.Cold Storage

- Stored in -18℃ to -20℃ cold rooms until dispatch.

9.Export Documentation & Logistics

- Compliance with export certificate (HACCP, EU, FDA, etc.).
- Shipping in refer containers to maintain cold chain until destination.
